Introduction

I pursued my internship in Ajker Patrika a daily newspaper of Bangladesh. Ajker Patrika is one of the leading newspapers as it has both online and traditional version. I particularly worked in the video team. My main duty was to make video package. With the help and supervision of my supervisor, I successfully made a good number of video package story on my own.

As Ajker Patrika is a daily print newspaper, they are working on their online sector. I was already interested in video works from my course work. So, when they asked me in which department I want to work, I insisted on working in video team.

As an intern I was a little bit confused about how the work is done in a actual media house. Other than that, I was worried about my Bangla writing skill as our main language was English while studying. But over the time as worked there I successfully developed my Bangla Script writing skill as I need to write at least 1 script every day. Besides, my typing speed was good before joining, I never failed to submit any script on time.

Beside script writing practice and giving voice over for different video packages, my main duty is to find news stories and make video packages. At first, I felt little bit nervous as I had to go out take interviews and organize everything as a video package. In this case I should thank my Coordinator for helping me overcome all the difficulties that I faced.

Working in Ajker Patrika was challenging but it helped my cope up with the office environment. Every colleagues that I found while working was very friendly and everyone helped me to complete my projects as a intern. After working 8 weeks in that office, I successfully produced 14 video projects. In this project I will display 8 projects that I think my best.

Expectation

During my internship time I wanted to apply my journalistic capabilities to make actual news. As I was always interested in making video projects during my academic time, I managed to join the online video team in Ajker Patrika. - I expected to learned how to make a real video package which is going to be published.

Besides, in every sub district of Bangladesh, Ajker Patrika has a reporter who sends news both for print and multimedia. Although the organization is new, the people who working here are dedicated and making this organization unique every day.

Internship outcome

As our last learning period our university offer us to work in real-life as a intern for 8 weeks. I pursued my Bachelors in Media studies and Journalism department and my Concentration Digital Journalism. I actually have a curious mind which is why I wanted to be a journalist. It's a challenging Job, but while working as an intern, I really enjoyed my work.

I started working at Ajker Patrika with a spirit of doing challenging work. I was clear about my decision in working in a news media. Ajker Patrika is one the reputed media house of Bangladesh and I am very proud to contribute something with them.

Realization:

Most of the people working in a media house didn't study journalism. Same goes for Ajker Patrika. A very few people in that office actually has a degree on journalism. I realized one think on the first week that, in this kind of work I am faster than them, because I have already studied Journalism as my major from the best university of Bangladesh in media sectors. I was just waiting for the push. After I completed my 3rd or 4th story as a reporter, my supervisor was also thinking the same thing. I never denied any responsibility that I was given. I completed every single task I was asked to do. So, at the end my supervisor was pleased with my overall performance.

Basically, I choose journalism as my major is because I have interest in working in this particular field and in my internship period, I applied every single learning in detailed that I managed to observe in my 4 years of learning period.

Achievement from Ajker Patrika:

In my 2 months of internship time, I learned to handle the pressure and work under deadline. The most important part was, I had a weakness in writing in Bangla. After working in Ajker Patrika, I recovered from that situation and managed to write a lot of script.

Beside all that in just 8 weeks I produced 13 video projects, 1 online written project. I am proud of myself for working very hard in this internship period.

Especially my Supervisor Tanmay Paul was very friendly and he made it possible for me to work independently. I gathered a huge amount of knowledge in journalism work process working with Ajker Patrika. My experience was good and I surely recommend this Media house as an internship destination.
